MEMORANDUM FOR: NSA/TCO

ATTENTION: [REDACTED]

THROUGH: [REDACTED]

SUBJECT: Echo Class Submarines, Magadan/Nagayev Port Facility, USSR

REFERENCES: a. Requirement No. NSA/PO432/R82-64 (Project No. W 525-6-)
b. NPIC/R-253/64 - April 1964
c. NPIC/R-274/64 - May 1964

1. In response to reference (a), a re-analysis of photographic coverage of the subject facility was accomplished.

2. No change in the Submarine Order of Battle as contained in reference (b) was noted.

3. Imagery available at this time permits the Submarine Order of Battle contained in reference (c) to be amended as follows: 1 ATRK ASL, three probable W-Class SS and ten small auxiliaries.

4. Initial read-outs of this target (OAKs) were performed on the best materials available at that time. However, the enclosed prints from 4007 clearly reveals the discrepancy of seven small surface craft vice four possible submarines as reported. This being the result of much improved imagery.

5. No Echo-Class SSGN are imaged at Magadan (59-50N 150-46E) on 4006 or 4007. The submarines identified are not at the port facility but at the shipyard and are being supported by the ATRK Class ASL.
